

stellar

180lm, 350/700mA, 50000h, 1-3W, 6-8pch

„Stellar“ is a miniature, wide beam light, which is suitable not only for decorative and furniture lighting but also for general, bathroom, emergency and hallway lighting. Wide choice of case and light colour enables to find best solution. This lamp can be used with controlled and uncontrolled power supply, with current up to 700mA. Spring mount makes installation easy, needs no special tools and the position is slightly adjustable. For decorative lighting we recommend spacing 30-60cm and current up to 350mA, for general lighting use 1-2 lamps per sq metre and 700mA current.

- power 1-3W
- current 350mA – 750mA
- 100 – 180 lumens
- beam angle $\pm 45^\circ$ (50%)
- 6 – 8 units per power supply
- surface temperature 20..70°C
- installation hole 20..30mm
- wire length 200mm

Beam characteristics(cd), 350mA, cool white

STELLAR – XX – YY – OO
